SITUATION REPORT (SITREP) # 308

12TH – 16TH APRIL 2021

FIELD ACTIVITIES: MONITORING EXERCISES

Field activities including monitoring and inspection of WaterFund's projects continued across the past weeks.

- Monitoring and inspection of the ongoing construction of a bio-sanitation facility at Kakuma town, Turkana West Sub-County. The facility which is expected to serve approximately 500 people a day will include a sanitation facility, bathrooms, cafeteria and a kitchen. This project is being implemented by Oxfam under WaterFund's Water and Livelihood Programme (WLP). The project has received financial support from the Danish International Development Agency (DANIDA).
- WaterFund staff monitored the clearing activity of a piece of land at Moa village, Dide Waride location, Lamu County. The clearing is being done in order to remove the *Prosopis juliflora* weed (nicknamed *Mathenge* in Kenya). Mathenge is an invasive weed species that adversely affects the local biodiversity, indigenous vegetation, arable land and livestock, and thus also human livelihood. This activity has been implemented by Hanshak Nyongoro Community Conservancy (HNCC) and received financial support from The Danish International Development Agency (DANIDA).
